

Community Lead Assistant

Chrome Extension Installation Guide

This guide explains how to install the extension, understand permissions, troubleshoot common issues, and use the product safely. The extension scans visible content on supported platforms, saves qualified leads, and helps draft manual outreach. It never sends messages automatically.

1. Install the Extension

1	Extract CommunityLeadAssistant.zip.
2	Open Chrome and visit <code>chrome://extensions</code> .
3	Turn on Developer mode.
4	Click Load unpacked.
5	Select the extracted Extension folder. This folder contains <code>manifest.json</code> .
6	Open the extension popup and sign in with email/password, Google login handoff, or active website session sync.
7	Open a supported platform and start a scan.

2. Required Permissions

storage	Stores local scan status, recent leads, sync state, and extension settings.
tabs / activeTab	Detects the current supported platform and opens dashboard/source pages when the user clicks.
scripting	Injects scanner scripts only on supported platform pages.
downloads	Exports local CSV files when the user clicks export.
clipboardWrite	Copies manual outreach drafts after user action.

3. Supported Browsers and Platforms

Supported browser: Google Chrome and Chromium-based browsers that support Manifest V3 unpacked extensions. Supported platforms: Reddit, LinkedIn, Facebook Groups, Discord, Slack, Telegram, WhatsApp Communities, IndieHackers, Product Hunt, and X.

4. Troubleshooting

Chrome says folder name is not valid	You selected the ZIP file or the wrong folder. Extract the ZIP and select the Extension folder.
Extension does not appear	Confirm Developer mode is on and manifest.json is inside the selected Extension folder.
Login fails	Check the website URL, confirm your account credentials, and make sure the dashboard is open.
Unsupported platform message appears	Open one of the supported platforms listed in this guide. Scripts are not injected into unsupported platforms.
Leads are not syncing	Use Sync now, check your dashboard session, and confirm the backend can reach your dashboard.

5. FAQ

- Does the extension auto-send messages? No. Every outreach action requires user review and manual send.
- Can I load the ZIP directly? No. Extract the ZIP and select the Extension folder.
- Does it work everywhere? No. It only activates on supported platforms.
- Can I export leads? Yes. Use the extension CSV export or dashboard exports.
- What should I do after editing files? Reload the extension from chrome://extensions.

Safety note: Community Lead Assistant is a lead intelligence and manual drafting tool. It is not a spam tool.
